

# Barracuda NextGen Firewall F

Protecting Your Digital Assets in Google Cloud

The growth in cloud computing capabilities and services has driven more data into places where traditional IT security measures cannot reach — into data centers not owned by your corporate IT group. Beyond its powerful network firewall, IPS, and VPN technologies, the Barracuda NextGen Firewall F-Series integrates a comprehensive set of **next-generation firewall technologies, including comprehensive application control, availability, and Quality of Service (QoS) features.**

## Security

- Data Protection
- Application Delivery

## The Barracuda Advantage

- Secure and reliable connectivity between on-premises and Google Cloud deployments
- Granular application control
- Full user awareness
- Central management of all functionality for both, on-premises and Google Cloud deployments
- Unrivaled Quality of Service capabilities

## Product Spotlight

- Powerful next-generation network firewall
- Advanced Threat Protection (incl. sandboxing)
- Built-in web security and IDS/IPS
- Client-to-Site VPN via browser (SSL VPN), mobile apps and desktop VPN clients
- Full application visibility and granular control
- Intelligent traffic regulation including application-based provider selection
- Tightly integrated Quality of Service (QoS) and link balancing
- Centralized management of all functionality
- Template-based and role-based configuration

### Granular Application Control

The Barracuda NextGen Firewall F-Series gives administrators granular control over applications, allowing them to define rules for forwarding data traffic using the best respective transmission channels based on type of application, user, content, time of day, and geographical location. The Barracuda NextGen Firewall F-Series allows organizations to prioritize traffic by limiting or restricting access to non-business-related applications and network traffic, even when encrypted.

### Central Management

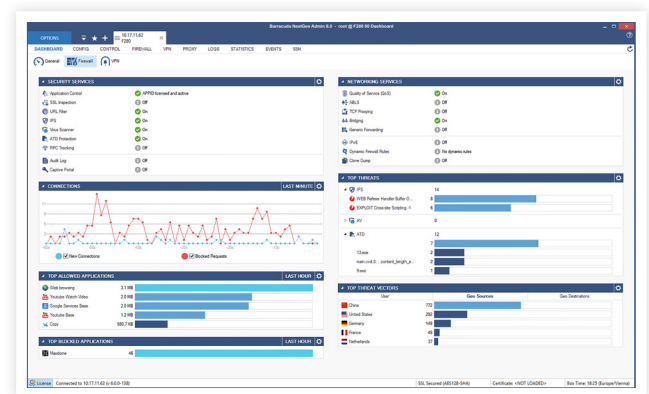

The Barracuda NextGen Firewall F-Series uses the same industry-leading single-pane-of-glass central management as on-premises deployments do. Easily manage the secure VPN connections to, from, and within Google Cloud and the Barracuda NextGen Firewall F-Series deployment itself.

### Integrated Next-Generation Security and Connectivity

The Barracuda NextGen Firewall F-Series Intrusion Detection and Prevention System (IDS/IPS) strongly enhances network security by providing complete and comprehensive real-time network protection against a broad range of network threats, vulnerabilities, exploits, and exposures in operating systems, applications, and databases preventing network attacks such as SQL injections and arbitrary code executions.

The F-Series incorporates advanced site-to-site and client-to-site VPN capabilities, using both SSL and IPsec protocols to ensure remote users can easily and securely access network resources without complex client configuration and management.

The Barracuda NextGen Firewall F-Series dashboard provides real-time information and summaries of what is going on in an organization's network.

## Technical Specs

### Firewall

- Stateful packet inspection and forwarding
- Full user-identity awareness
- Intrusion detection and prevention system (IDS/IPS)
- Application control and granular application enforcement
- Interception and decryption of SSL/TLS encrypted applications
- Antivirus and web filtering in single pass mode
- SafeSearch enforcement
- Google Accounts Enforcement
- Denial of Service protection (DoS /DDoS)
- Spoofing and flooding protection
- ARP spoofing and trashing protection
- DNS reputation filtering
- TCP stream reassembly
- Transparent proxying (TCP)
- NAT (SNAT, DNAT), PAT
- Dynamic rules / timer triggers
- Single object-oriented rule set for routing, bridging, and routed bridging
- Virtual rule test environment

### User Identity Awareness

- Terminal Server Agent
- Domain Controller Agent
- Authentication – supports x.509, NTLM, RADIUS, RSA SecurID, LDAP/LDAPS, Active Directory, TACACS+, SMS Passcode (VPN), local authentication database

### Intrusion Detection and Prevention

- Protection against exploits, threats, and vulnerabilities
- Packet anomaly and fragmentation protection
- Advanced anti-evasion and obfuscation techniques
- Automatic signature updates

### Traffic Optimization

- Link monitoring, aggregation, and failover
- Dynamic routing
- Application-based provider selection
- Traffic shaping and QoS
- On-the-fly flow reprioritization
- Stream and packet compression
- Byte-level data deduplication
- WAN optimization (SMBv2)

### VPN

- Drag and drop VPN tunnel configuration
- Secure site-to-site, client-to-site VPN
- Supports AES-128/256, 3DES, DES, null ciphers
- Private CA or external PKI
- IPsec VPN / SSL VPN
- VPNC certified (basic interoperability)
- Application-aware traffic routing
- PPTP / L2TP (IPSec)
- Network Access Control
- iOS and Android mobile device VPN support

### Central Management Options

- Barracuda NextGen Control Center
  - Central administration of unlimited F-Series Firewalls
  - Support for multi-tenancy
  - Multi-administrator support and RCS

### Advanced Threat Protection

- Dynamic, on-demand analysis of malware programs (sandboxing)
- Dynamic analysis of documents with embedded exploits (PDF, Office, etc.)
- Detailed forensics for both, malware binaries and web threats (exploits)
- Support for multiple operating systems (Windows, Android, etc.)
- Botnet and Spyware Protection
- Flexible malware analysis in the cloud

### Infrastructure Services

- SIP, HTTP, SSH, FTP proxies
- SNMP and IPFIX support
- DNS Cache
- SMTP gateway and SPAM filter

### Protocol Support

- IPv4, IPv6, ARP
- BGP/OSPF/RIP
- VoIP (H.323, SIP, SCCP [skinny])
- RPC protocols (ONC-RPC, DCE-RPC)

<sup>2</sup> Premium Support ensures that an organization's network is running at its peak performance by providing the highest level of 24x7 technical support for mission-critical environments. For more information please visit <https://www.barracuda.com/support/premium>.

## Support Options

### Barracuda Energize Updates

- Standard technical support
- Firmware updates
- IPS signature updates
- Application control definition updates
- Web filter updates

## Security Options

- Advanced Threat Protection
- Malware Protection
- Advanced Remote Access subscription provides remote access via the CudaLaunch app for Windows, macOS, iOS, and Android devices

Specifications subject to change without notice.
